### Profile

Passionate and dedicated React.js developer with a strong foundation in front-end development. As a fresher, I bring enthusiasm, a fast-learning mindset, and a deep passion for building responsive, user-friendly web applications. Eager to contribute to real-world projects and grow as a professional in a dynamic development team.

### Internship

06/2024 – 04/2025  
Ahmedabad, India

#### Frontend Developer Intern Ahmedabad Computer Education (ACE)

Internship at Ahmedabad Computer Education (ACE) as a Frontend Developer Intern. Gained hands-on experience in building user interfaces with React.js, integrating RESTful APIs, and styling with HTML and CSS. Worked on real-world projects under the guidance of experienced mentors, improved debugging skills, and collaborated effectively within a team to deliver clean, maintainable code.

### Education

08/2021 – 04/2024  
Gandhinagar, India

#### Bachelor of Computer Application Kadi Sarva Vishwavidyalaya

Completed Bachelor of Computer Application (BCA) with a strong foundation in programming, web development, and database management. Actively participated in technical workshops and project work, with a keen interest in frontend development using React.js and JavaScript.

2020 – 2021  
Talod, India

#### 12th HSC Shri C. D. Patel High School

### Skills

#### Frontend Development

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material-UI

#### Version Control & Tools

Git, GitHub, Postman

#### API Integration

Axios, JSON handling

#### State Management

Redux Toolkit (Slices, Thunks), Context API

#### Soft Skills

Quick learner, Team collaboration, Problem-solving, Time management, Adaptability

### Projects

#### Fashion E-Commerce Website

A responsive fashion website for men's and women's clothing and accessories. Users can browse products by category, view detailed product info, and add items to the cart. Includes dynamic product fetching and role-based routing for admins, sellers, and users. Tech Stack: React.js, Redux Toolkit, MUI, Tailwind CSS Role: Developed dynamic category components, integrated APIs, and implemented protected routes for different user roles.

## Currency Converter Web App

A simple and interactive currency converter that allows users to convert between multiple currencies using real-time exchange rates. Designed for a smooth user experience with clean UI. Tech Stack: HTML, CSS, JavaScript, REST API Role: Built the complete UI, fetched live exchange rates from an API, and handled input validations and result display.
